Applicant KANG HYUNG-CHUL		

This international search report has been prepared by this International Searching Authority and is transmitted to the applicant according to Article 18. A copy is being transmitted to the International Bureau.

This international search report consists of a total of 4 sheets.

☐ It is also accompanied by a copy of each prior art document cited in this report.

1. Basis of the report

a. With regard to the **language**, the international search was carried out on the basis of the international application in the language in which it was filed, unless otherwise indicated under this item.

☐ the international search was carried out on the basis of a translation of the international application furnished to this Authority (Rule 23.1(b)).

b. With regard to any **nucleotide and/or amino acid sequence** disclosed in the international application, the international search was carried out on the basis of the sequence listing:

☐ contained in the international application in written form.

☐ filed together with the international application in computer readable form.

☐ furnished subsequently to this Authority in written form.

☐ furnished subsequently to this Authority in computer readable form.

☐ the statement that the subsequently furnished written sequence listing does not go beyond the disclosure in the international application as filed has been furnished.

☐ the statement that the information recorded in computer readable form is identical to the written sequence listing has been furnished.

2. ☐ **Certain claims were found unsearchable** (See Box I).

3. ☐ **Unity of invention is lacking** (See Box II).

4. With regard to the **title**,

☒ the text is approved as submitted by the applicant.

☐ the text has been established by this Authority to read as follows:

5. With regard to the **abstract**,

☐ the text is approved as submitted by the applicant.

Box III TEXT OF THE ABSTRACT (Continuation of item 5 of the first sheet)

A pimple removal utensil (100) is provided in which pimples are easily squeezed open sanitarly with the pimples left untouched irrespective of size of the pimples. The pimple removal utensil (100) includes a holder (101) having an uneven surface (102) which is formed to be easily held by the hand, and an auxiliary grip protruded perpendicularly with the uneven surface (102), and a pressing portion (106) in which a first extension (110) and a second extension (120) are formed so that both extensions (110, 120) correspond to each other by opening one portion on the circumference of an insertion hole (114), and gradually narrowing the opened edges, and the bottom surface thereof is formed of a convex curved surface. A massage ball is further provided on the upper portion of the holder (101). The first and second extensions (110, 120) are made of a number of indents, which are gradually narrowed in correspondence to each other.
